Back To School!

Presidential Approach

Northwest Magazine is so back!

I am so glad to be reviving an old school tradition back. Northwest Guilford High School is one of the highest rated public high schools in Guilford County, however I always sensed a lack of traditional high school experience.

Northwest had seemed to have lost its journalistic attributes that it used to have. A high school magazine is not just a digital archive of words and pictures. It forms a community that works together in unity. Teamwork where no one is competing against each other, in fact we all try our best to help each other grow.

A high school magazine creates a sense of school spirit and stores history within in.

I highly encourage you to check out our march publication from last year before checking us out now!

You may find the publish [here!](#)

Is the new year stressing you out? Here are some tips and tricks to keep calm and carry on during this stressful time!

Keep a planner.

Keeping a planner can help you stay up to date and organized on assignments and future tests/quizzes so nothing gets sprung on you!

Plan study sessions

Creating study sessions with friends or family members can not only help you (obviously) study, but it also allows you to see friends you may not see as often, or build closer bonds with classmates (as long as you stay on task)

Visit the counselors

It may not always seem so, but your school counselor is here to make sure you succeed just as much as a teacher is. Don't hesitate to ask questions or just find time to talk to them, they're there to help.

Pick up a new hobby

While you don't need to pick up anything crazy like crocheting or service learning, picking up new hobbies can be a great escape for stressful emotions, and a great distraction during tough times. Even if it's something as simple as finding time to draw stars all over papers.

Are your classes requiring more materials than you initially anticipated? Here are some places/organizations that can help!

Salvation Army: Collect things such as backpacks, books, pens, pencils, etc

United Way: Organizing school drives, collecting and distributing donations made

Kids in Need Foundation: Provide resources to under-resourced schools and students.

DonorsChoose: Allows teachers to create project proposals for school supplies

Y-12 National Security Complex: conducting internal school supply drives for local organizations

Local churches or community centers: organizing and distributing supplies

Governor Coopers School Supplies Drive: Collecting donations through community partnerships to help distribute school supplies

BACK TO SCHOOL!! lets see how your year has started!
